

## Discussion questions:

- 1) Is this the first Ackerman bird book that you have read?
- 2) Are you interested in reading her other works in our OPAS Book Club?
- 3) Did you notice the Further Reading appendix? Are there sources there that you would like to read? ( I am intrigued by Low's Where Song Began: Australia's Birds and How they Changed the World)
- 4) Did the stories in the book change your understanding of bird behavior?
- 5) Which stories did you find provocative?
- 6) From studying birds, do we gain more understanding of human behavior?
- 7) I hope The Bird Way gave you increased appreciation for bird intelligence, resourcefulness and adaptability. As Audubon stewards for birds, what can we be doing to preserve habitat in Clallam County to help birds survive Climate disruptions?
